

SALES TAX SIMPLIFICATION

A *One Payment, One Point of Contact, One Audit*

Eighteen different cities and the State of Arizona tax and audit Valley businesses. These businesses shouldn't have to write multiple checks to multiple taxing entities each month.

Wouldn't one point of contact be simpler and more efficient for both the tax collector and tax payer? One entity for taxing, administering and auditing businesses is the most efficient process and relieves business owners of the burden of being tax experts.

B *One in a Million*

There are 7,000 taxing jurisdictions in the United States. Arizona is one of only four states still using this antiquated, burdensome system and one - Louisiana - is reforming its tax system and taking the steps to be more business-friendly.
